

KCHI, like most small market radio stations, make our money on local programming. Local news, sports, weather, and sporting activities are the primary programming. We have as many local people on the air as possible... recording commercials, PSA's, and school news. Please reconsider this proposal to record the "on air" programming. I have know idea how we would do this... but I'm sure some equipment companies will have some type of equipment that will cost too much for a small broadcaster like myself to afford. Please call me so I can find out first hand why the Commission is so concerned with this proposal. Please don't penalize the small market broadcaster with a blanket ruling that has come about simply from a "Major Market" concern. Once again, I would really like to talk with a Commissioner to share some ideas on how the FCC and all broadcasters can communicate their concerns. Can a FCC commissioner please call me at 660646-4173.
